

AMENDMENTS TO THE CLAIMS

The claims in this listing will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

Claim 1 (Currently Amended): Light-protective cosmetic or dermatological ~~preparations~~ preparation, ~~characterized in that they contain~~ comprising:

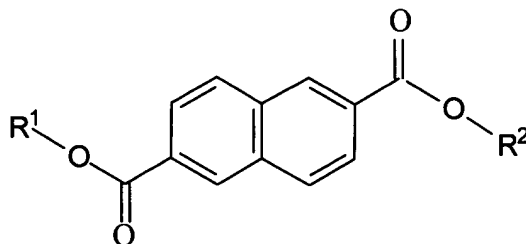

- (a) at least one hydroxybenzophenone and
- (b) at least one dialkyl naphthalate ~~that is characterized by~~ comprising the structural formula

where R¹ and R² are ~~selected independently of one another from the group of~~ branched and unbranched alkyl groups with 6 to 24 carbon atoms.

Claim 2 (Currently Amended): Light-protective cosmetic or dermatological ~~preparations~~ preparation, ~~characterized in that they contain~~ comprising synergistic substance combinations of

- (a) at least one hydroxybenzophenone₁ and
- (b) at least one dialkyl naphthalate ~~that is characterized by~~ comprising the structural formula

where R^1 and R^2 are ~~selected independently of one another from the~~ group of branched and unbranched alkyl groups with 6 to 24 carbon atoms,

wherein the UV protective effect, in particular the UVA protective effect, of ~~these preparations~~ the preparation is higher than that of the same ~~preparations~~ that do preparation that does not contain any substances according to (b).

Claim 3 (Currently Amended): Preparation according to claim 1, ~~characterized in that~~ wherein the ~~content of one or more~~ at least one dialkyl naphthalates naphthalate is ~~selected from the~~ present in a range of from 0.001 to 30% by weight, ~~preferably 0.01 to 20% by weight, very particularly preferred 0.5 to 15% by weight,~~ relative to the total weight of the preparation.

Claim 4 (Currently Amended): Preparation according to claim 1, ~~characterized in that it contains~~ comprising at least one further UV filter substance, ~~selected from the group~~ comprising at least one of triazines, benzotriazoles, liquid UV filter substances and at least one of organic ~~and/or~~ and inorganic pigments.

Claim 5 (Currently Amended): Preparation according to claim 1, ~~characterized in that it contains~~ comprising at least one further UVA filter substance and/or a broadband filter, ~~selected from the group~~ comprising at least one of dibenzoylmethane derivatives ~~[in particular 4 (tert. butyl) 4'~~

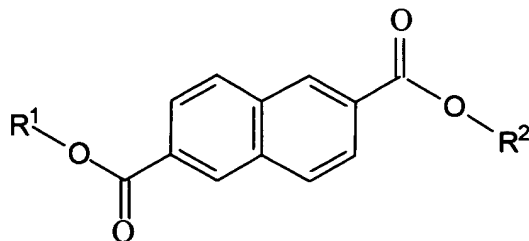

~~methoxydibenzoylmethane]~~ and 2,4-bis{[4-(2-ethylhexyloxy)-2-hydroxy]phenyl}-6-(4-methoxyphenyl)-1,3,5-triazine, ~~wherein the further filter substances can be present each individually or in any desired combination with one another.~~

Claim 6 (Currently Amended): Preparation according to claim 1, ~~characterized in that it contains~~ comprising at least one of at least one flavone glycoside, ~~in particular α -glucosylrutin, and/or~~ and vitamin E and/or derivatives thereof.

Claim 7 (Currently Amended) A method of moistening skin comprising applying a preparation ~~Use of preparations according to claim 1 for moistening on the skin.~~

Claim 8 (Currently Amended) A method of protecting skin against light-related aging of the skin comprising applying a preparation ~~Use of preparations according to claim 1 for protecting against light-related aging of on the skin.~~

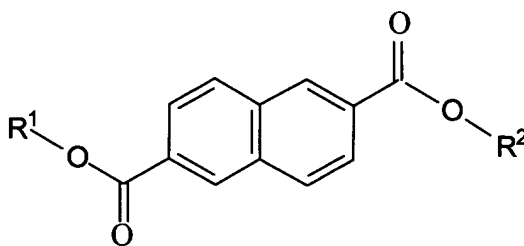

Claim 9 (Currently Amended) A method of achieving or increasing solubility of at least one hydroxybenzophenone comprising combining said at least one hydroxybenzophenone with ~~Use of one or more~~ at least one dialkyl naphthalates ~~that are characterized by~~ naphthalate comprising the structural formula

where R¹ and R² are ~~selected independently of one another from the group of~~
branched and unbranched alkyl groups with 6 to 24 carbon atoms,
~~to achieve or increase the solubility of hydroxybenzophenones.~~

Claim 10 (Currently Amended): A method of stabilizing dibenzoylmethane derivatives in cosmetic or dermatological preparations against decomposition that is induced by UV radiation comprising including ~~Use of substance combinations of~~

- (a) at least one hydroxybenzophenone and
- (b) ~~one or more~~ at least one dialkyl naphthalates that are characterized by naphthalate of the structural formula

where R¹ and R² are ~~selected independently of one another from the~~
~~group of~~ branched and unbranched alkyl groups with 6 to 24 carbon atoms,
~~for stabilizing dibenzoylmethane derivatives in a~~ cosmetic or dermatological
~~preparations~~ preparation containing dibenzoylmethane derivatives in an amount
effective to stabilize the dibenzoylmethane derivatives against the decomposition
that is induced by UV radiation.

Claim 11 (New): Preparation according to claim 3, wherein the at least one dialkyl naphthalate is present in a range of from 0.01 to 20% by weight relative to the total weight of the preparation.

Claim 12 (New): Preparation according to claim 11, wherein the at least one dialkyl naphthalate is present in a range of from 0.5 to 15% by weight relative to the total weight of the preparation.

Claim 13 (New): Preparation according to claim 5, wherein said dibenzoylmethane derivatives comprise 4-(tert.-butyl)-4'-methoxydibenzoylmethane].

Claim 14 (New): Preparation according to claim 1, wherein the at least one flavone glycoside comprises α -glucosylrutin.

Claim 15 (New): Preparation according to claim 2, wherein the at least one dialkyl naphthalate is present in a range of from 0.001 to 30% by weight relative to the total weight of the preparation.

Claim 16 (New): Preparation according to claim 2, comprising at least one further UV filter substance comprising at least one of triazines, benzotriazoles, liquid UV filter substances and at least one of organic and inorganic pigments.

Claim 17 (New): Preparation according to claim 2, comprising at least one further UVA filter substance and/or a broadband filter comprising at least one of dibenzoylmethane derivatives and 2,4-bis{[4-(2-ethylhexyloxy)-2-hydroxy]phenyl}-6-(4-methoxyphenyl)-1,3,5-triazine.

Claim 18 (New): Preparation according to claim 2, comprising at least one of at least one flavone glycoside and vitamin E and/or derivatives thereof.

Claim 19 (New): Preparation according to claim 5, comprising at least one further UVA filter substance and/or a broadband filter comprising at least one of dibenzoylmethane derivatives and 2,4-bis{[4-(2-ethylhexyloxy)-2-hydroxy]phenyl}-6-(4-methoxyphenyl)-1,3,5-triazine.

Claim 20 (New): Preparation according to claim 4, comprising at least one of at least one flavone glycoside and vitamin E and/or derivatives thereof.
